

NURMEREY AIDOS

 Nurmerey Aidos  Nurmerey Aidos  aidosnurmerey@gmail.com

EXPERIENCE

LARCASE, École de technologie supérieure ÉTS

Intern — Aircraft Trim Condition Detection

Montréal, Canada

May 2025 - September 2025

- Analyzed Machine Learning Algorithms for Data Analysis of Flight Tests and **solved the Imbalanced Classification problem with 9:1 class ratio.**
- Developed the ML Model for Aircraft Trim Condition Detection with **analyzing 1286 flight tests and detecting new stable intervals.**
- Achieved **80% higher accuracy of ML Model using CatBoost** than any other algorithms and manual segmentation
- **Reduced overfitting** and improved model generalization across aircraft datasets by **Sliding Window Technique.**

Nazarbayev University

Research Assistant — Polyurethane Nanocomposites and Coatings

Astana, Kazakhstan

March 2025 - May 2026

- **Achieved uniform dispersion** of hydrophobic nanofibers in a polyurethane matrix via **ball milling (2 hours, with toluene)**, resolving persistent **nanofiber agglomeration** issues
- Manufactured and mechanically **tested 268 samples** (0–0.5 wt% PNF/PU) under **tensile and shear loading**
- Delivered a **217% increase in tensile strength** and **185% increase in shear strength** through optimized nanofiber loading
- Fabricated **fiber metal laminates** and **polyurethane protective coatings**; conducted mechanical and environmental testing, generating structured datasets for **machine learning model development**

TOO KazAeroSpace

Intern

Astana, Kazakhstan

Summer 2024

- **Designed and 3D-printed** functional parts for the "Sky Photography Using a Portable Camera for Aerospace Objects" project, enabling successful **manufacturing and deployment** of the device
- Led **presentations and partnership negotiations with Google** to mount cameras on vehicles for "Google Street View coverage of Kazakhstan", resulting in a **successfully launched program** with cameras mounted

EDUCATION

École de technologie supérieure ÉTS, Montréal, Canada

Master of Science in Aerospace Engineering

Enrolled: 2026 — Expected: 2028

Nazarbayev University, Astana, Kazakhstan

Bachelor of Engineering in Mechanical and Aerospace Engineering

2022 — 2026

Overall GPA: 3.27

Relevant Courses: Aerodynamics, Computer Aided Engineering, Thermodynamics, Machine Elements Design, Control Systems, Vehicle Propulsion Systems, Aerospace Propulsion, Heat Transfer, Mechanical Systems Design.

SKILLS

- **Programming:** C++, Matlab, Python, Machine Learning, Pandas, NumPy, SQL
- **Software:** ANSYS, SolidWorks, Simulink, Microsoft Office, Wolfram Mathematica
- **Certificates:** Certified SolidWorks Associate (CSWA), CITI Program "Social and Behavioral Research"
- **Languages:** Kazakh (Native), Russian (Native), English (Advanced), French (Pre-Intermediate)

ACHIEVEMENTS

Kazakhstan National Physics Olympiad: **3rd Place**, The Presidential Olympiad in Mathematics, Physics, Chemistry and Biology: **Bronze Medal**, MathCombat by University Association in Mathematics: **1st Place**
